

GSA Catalog 2017

Letter from the President

July 2017

The Age of Non-Secrets

We have seen a resurgence in traditional media usage in the past year which we can directly trace to the explosion of hacking and security breaches on computers and networks in government and industry. If sensitive information is only contained, for example, on a CD-R disc, then this can be transferred personally to an end-user. That end-user can consume the information and, when it is no longer necessary, can completely destroy the digital data content.

It seems at times recently that there are no more secrets and those who are charged with safeguarding our secrets are incapable of this responsibility. It also seems that many who have sworn an oath to safeguard sensitive and classified information believe that they have an inherent right to reveal this information and justify it as some distorted form of civic duty. From Snowden at NSA to Wikileaks' release of Vault 7 and other materials allegedly stolen from the CIA by another contractor, to charges and counter-charges that official Russia is responsible for attempting to influence the elections of the United States., we are experiencing an unprecedented explosion of highly damaging unauthorized release of information. Indeed, we might call the time we live in as an age of non-secrets.

CD ROM, Inc. for many years now has been developing tools to protect information. Many of our duplication products have no hard drives which permits a very high level of security when copying sensitive information either on optical discs or other hard drives. Many of our products are vetted by DoD and others against the most stringent standards available confirming when digital information is no longer retrievable with any known technology. At the other end of the continuum, for the past several years, we have been introducing forensic recovery tools and services which provide unmatched ability to recover information from virtually any form of storage media. See for example in this catalog the CRI Forensic 121.

If and when it were no longer possible to have secret information, governments would fail. They would fail after business interests fail. Trademarks and patents would become obsolete. This unlikely future would be heralded by individual people who could neither honor an oath nor keep a secret.

At the core of our competency is a fundamental understanding of the full-circle life and death of a digital signal. And we know both how to honor an oath and to protect corporate and government secrets.

Roger Hutchison

President and CTO

Pro Flash Duplicators

CRI Pro Flash Series

CRI PF USB/Memory Card Duplicator and Backup Systems Up to 32GB Card Capacity

Image shows 2-, 3- and 4-drive systems.

Backup your important data from erasable memory cards or flash drives to CDs, DVDs or Blu-ray! The CRI PF Series Flash Duplicators are your all-in-one, stand-alone solution for data backup and disc duplication. No hard drive required., the CRI PF Series Flash Duplicators have a compact and stylish design with multiple memory card and USB drive readers built in. Intelligent multi-session and disc-spanning technologies make data transfer as easy as one touch of a button. The CRI PF Series Flash Duplicators are also disc-duplicators that copy up to 3 discs at a time. Experience all the benefits that the CRI PF Series Flash Duplicators/Flash Multimedia Backup System has to offer. Able to copy SD, Flash and memory cards up to 32 GB. See exFAT-capable duplicators for greater than 32GB capacity.

Features:

- 2 CD/DVD/BR Drives
- Multi-Session: Combine several small-size memory cards and US drives together into a single disc.
- Disc-Spanning: Source file larger than a single DVD can span to multiple discs.
- Multiple Disc Burning: Burn multiple CDs, DVDs or BR discs at once from a single source.
- No Hard Drive required
- Compact and stylish design with multiple memory card and USB drive readers built in.
- 12x Blu-ray drives up to 50GB capacity.

Pro Flash Duplicators

CRI Pro Flash Series USB/Memory Card Duplicators and Backup Systems Greater than 32GB Card Capacity

Image shows 4-drive system.

The world's first exFAT-capable USB/memory card duplicator and backup system. Now, back up your important data from erasable memory cards or flash drives to archival CDs, DVDs or even 100GB BDs and 128GB BDXL. The CRI ProFlash Duplicator is your all-in-one, stand-alone solution for data backup and disc duplication. No hard drive required. The CRI PFD has a compact and stylish design with multiple memory card and USB drive readers built in. Intelligent Multi-Session and Disc Spanning Technologies make data transfer as easy as one touch of a button. The CRI PFD is also a disc duplicator that copies up to three discs at a time in the 4-BD model.

Features:

- CD/DVD/BD to CD/DVD BR: Duplicates audio CD, video CD, DVD video and virtually any data disc in minutes - without a computer.
- Multi-Session Technology: Back up multiple items to CD, DVD or Blu-ray media, from small-capacity media of less than 32 GB to larger-capacity 1TB exFAT-formatted media.
- Disc-Spanning: Automatically distributes files to multiple target discs when copying a memory card with more data that can be held on one disc.
- 16x Blu-ray drives up to 100GB BD and 128GB BDXL capacity.

Hard Drive Duplicators

Simultaneously create from 1 to 15 duplicate Hard Drives quickly _ up to 7.2 GB per minute. Whole HD Copy supports most partition formats. CRI Duplicators can identify HDD formats of FAT 16/32/64, NTFS, Linux (ext2/ext3/ext4), Mac (HFS, HFS+, HFSX). Set to copy only the data and system contained area for enhanced copying efficiency.

Features:

- High performance transfer speeds of up to 7.2 GB per minute.
- FAT16/32/64, NTFS, Linux(Ext2?Ext3/Ext4), Mac(HFS, HFS+, HFSX)
- Data Sanitization: Quick Erase, DoD erase and Secure Erase.
- Open-platform design supports multi-interface HDD/SDD.
- Real-time PC Monitoring.
- Stand-alone operation.
- Log Report Management records all task details for better production management.
- Cable-free connections for faster, easier HDD insertion and removal.
- Real-time copy and compare technology to ensure successful and complete copies

Open-Platform Design

Easier HDD insertion and removal.
Swappable HDD Port Module: easy for replacement and maintenance.

Hard Drive Duplicators

1:1 HDD

Features:

- Ultra-high copy speeds supports up to 15GB/min.
- Auto power control protects your HDD. (HDD only powered during operation.)
- Support four different copy modes: quick copy (system and files); whole HDD copy; all-partitions copy; and percentage copy.
- Support FAT, NTFS, Linux (Ext2/Ext3/Ext4) and Mac (HFS/HFS+/HFX).
- Support DoD Erase and Secure Erase.
- Automatic power control protects HDDs from damage during insertion/removal.
- Light-weight for easy carry.
- Log output to PC and source read-only lock: professional log records all tasks and protects log text files as read-only in PC-link mode.
- Bad-sector counting: support auto-detection and display number of bad sector.

CRI Stand-alone CD/DVD/Blu-ray Duplicators

The CRI Stand-alone CD/DVD/Blu-ray Duplicator line is a combination stand-alone tower duplication system featuring high-performance writers, superior drive cooling and ventilation, and powered by the leading duplication controller technology available today. The CRI Pro is the perfect solution for applications requiring the high-capacity of optical disc media, including videography, medical imaging, data backup and interchange, as well as many others. These systems also support Blu-ray, providing users with triple functionality and versatility. Their user-friendly interface combined with simple two button operation allow any person to operate the systems.

Flash Duplicators

CRI USB Flash Duplicators

Stand-alone duplicators, portable and easy-to-use
Available in versions capable of reproducing
3 copies or up to 118 copies at one time!

Features:

- Copy speed: Up to 1.5 GB per minute for each port and up to 120 ports.
- Supports “quick copy” for Linux (ext2/ext3/ext4) and NTFS, FAT 16/32
- USB Dongle capacity up to 64GB
- USB-HDD capacity up to 4TB
- Complies with U.S. Department of Defense data-security standard; provides DoD erase function
- 4 kinds of professional quality diagnostic tools for flash module.
- “A2 Fake Picker” shows accurate capacity of USB/memory card to eliminate low-quality or fake flash media.
- “Speed Check” shows flash module reading/writing speed within 8 seconds.
- “H3/H5 Media Check” shows quantity of bad block through bit-for-bit examination.
- Supports synchronous and asynchronous modes for copy/compare/erase function.
- Strict bit-by-bit hardware comparison increases the reliability of duplication.
- User-friendly interface with real-time information LCD display.
- Firmware upgrade available with well-experienced team support.

Image shows 11-, 7- and 3-drive options.

The Pro-USB Duplicators conveniently copy portable USB storage drives and external USB hard drives **without the use of a computer**. Advanced asynchronous duplication means no waiting and no interruption because each channel can independently load, unload and copy. The Pro-USB Duplicators also feature user-friendly 4-key control with LCD, high-speed duplication and a bit-by-bit “Compare” function to confirm successful duplication.

The Pro-USB Duplicators are compatible with USB stick 2.0, 3.0, USB-HDD 2.0, 3.0, and other USB devices. The duplicators support all types of data-format copying while doing bit-for-bit duplication.

Image shows 15-drive option.

Daisy-Chain Duplicators

CRI DC-10 CD/DVD/BR Daisy-Chain Duplicator 10-Target, Stand-alone

Link additional towers together for large duplication applications—a total of 255 towers, 2,550 targets! Unit consists of 10 Blu-ray writers and (1) 500 GB HD. This tower can be used as a stand-alone tower or linked to other daisy chain units.

Features:

- Fully stand-alone. No PC required.
- Built-in 500 GB hard drive. Able to load disc image to HDD and rename the partition.
- Functions: Counter; Copy, Test, Compare, Verify
- Auto-source disc-analyzing, audio-track edit
- Set burn speed, select source drive
- Pre-scan, quick-erase, full-erase, eject all disc
- Disc info, drive info, system info
- Intuitive user-friendly LCD panel—Optional button beep can be disabled for silent operation.
- Linked firmware upgrade controller, upgradeable BIOS firmware, synchronize firmware controller
- 1 year warranty, parts & labor

CRI DC-10 CD/DVD/BR

Part No.	GSA

Industrial Rugged Blu-ray Burner

CRI Industrial Rugged Blu-ray Burner

Our industrial grade external 16x Blu-ray writer features a heavy-duty case, dedicated cooling fan and internal power supply. The USB 3.0/2.0 interface is plug-and-play compatible and hot-swappable. The Blu-ray format provides 20 times larger capacity of single layer DVDs, with unprecedented storage capacity of 25GB (single-layer) and 50GB (dual-layer) and 100GB TL. Our Blu-ray Disc external player is fully backward-compatible with current CD/DVD formats, delivering secure storage or entertainment content in full high-definition (HD) quality, under a secure environment made possible through the most advanced copyright protection technology.

Features:

- Drive Type: External
- Interface Type: USB 3.0, eSATA, 1394B Firewire, 1394 B Firewire
- BR Write Speed: 16x max
- DVD Write Speed: 16 max
- CD Write Speed: 48x max
- Buffer Capacity: 4MB

Supported Discs:

BD-ROM (SL/DL), (BD-R (XL/SL/DL/TL/QL), BD-RE (XL/SL/DL/TL), DVD-ROM (SL/DL), DVD± RW, DVD-RAM, M-DISC, CD-R/RW/ROM, CD-DA, Video CD"

Optical Disc Destruction

DX-CD2™

CD/DVD Disc Destruction Device*

Temporarily out of stock until 9-1-2015

*This DX-CD2™ has been evaluated by the NSA and meets the requires of NSA/CSS specification 04-02 for Optical Media.

Additionally, the DX-CD2 meets the requirements of the Canadian Royal Mounted Police for listing in the G1-001 Security Equipment Guide as an approved device for the destruction of all Classified and Protected Information on optical media when used in accordance with the operating instructions.

The DX-CD2™ 2nd Generation DX-CDe Destruction Device is the newest generation of CD/DVD destruction devices produced by the industry leader in the field of digital data destruction. Suitable for CD/DVD/Blu-ray.

This product is designed with the high-security sector in mind and follows the high-quality standards we have used for the past few years in our Department of Defense product line for classified data destruction. The DX-CD2™ design specification requires the data layer of optical drives to be ground to 250 microns - eliminating forensic recovery of data means by any known

	Part No.	GSA
DX-CD2	123601	\$1,375.96
Cutter	123603	\$ 68.75
Dust Bag (3)	791002	\$ 8.56

DX-CDm™ Disc Destruction Device

The DX-CDm™ is a manually operated disc destruction device. It is the world's first fully manual device demonstrated to substantially exceed the NSA specification for residue particle size when removing the information-bearing layer on CD-ROM, CD-R and CD-RW discs. The hub ring or clamping area of the disc remains untouched, thus allowing for confirmation of destruction.

The DX-CDm™ is designed to be used in ships, aircraft, fighting vehicles, and field units. The 20-lb unit uses very little space and can be mounted in any convenient location.

Mini Ruggedized PCs

CRI SRW-33m Rugged Fanless i5 Solid State Computer for Military and Industrial Use

Small Size, Big Performance

The SRW-33m offers high-performance computing in a diminutive footprint. Powered by the Intel Skylake Core i5-6300U processor, the SRW-33m is well-suited for a wide range of complex computing tasks. The U series Skylake processors find the right balance between performance and power efficiency with a processor speed of 2.4GHz and a power draw of only 15 watts. Along with the Skylake generation of processors comes support for DDR4 memory which allows for higher speeds, bandwidths, and power efficiency over DDR3. The SRW-33m also is available with optional [4G LTE connectivity](#), enabling remote network access or failover protection.

Rugged Reliability

The SRW-33m's fanless, ventless, and cableless design provides protection from dirt, dust, and vibration, allowing for reliable operation in even the most challenging environments. In addition, the SRW-33m utilizes wide temperature components which contribute to its impressive operating temperature range of -40°C to 70°C. All this makes the SRW-33m an extremely versatile and reliable computer in virtually any installation condition.

The SRW-33m comes equipped with an impressive I/O complement given its size. The I/O coastline includes six USB ports (four 3.0 ports, two 2.0 ports) and six RS-232/422/485 COM ports to meet any of your industrial peripheral needs. The SRW-33m has 2 Gb Ethernet ports and, if you need to go wireless, there are four antenna ports and 2 full-sized Mini PCIe sockets for wireless or other I/O expansion including optional 4G LTE connectivity. Additional I/O includes a DVI-I port and a DisplayPort connector providing for dual -HD display capability. The SRW-33m also accommodates expansion via unique CMI module technology. Use the CMI expansion bay to install additional LAN, PoE, or M12 ports.

Destruction Services

CD Rom, Inc., provides optical and electronic media destruction services and IT/electronic media recycling services. Tier Level 1 to 5 destruction procedures are employed for all forms of media which meet or exceed Government requirements for Classified information. Lower Tier Level destruction can be provided to meet customers' needs and sensitivity levels of information.

Please, visit www.d3services.com for a complete list of services.

Portable Storage Media Destruction and Recycling

- Audited receipt of material
- Transfer of liability
- 100% secure destruction
- Certificate of Destruction
- Green recycling of materials

Hard Disk Drive Media Destruction and Recycling

Tier Level 3

- HDD shredded via strip-shear, rendering data unreadable.

Tier Level 4

- HDD is sanitized via Secure Erase process, leaving drive available for future use.

Tier Level 5

- Degaussed to 5000oe. "Dead" media are transported for disassembly/disintegration.

Magnetic Tape Media Destruction and Recycling

- Audited receipt of material
- Transfer of liability
- 100% secure destruction
- Certificate of Destruction
- Green recycling of materials

Optical Media Destruction and Recycling

- Audited receipt of material
- Transfer of liability
- 100% secure destruction
- Certificate of Destruction
- Green recycling of materials

On- or off-site service available. Call for a customized quote and information on secure transportation methods.

Recovery Services

eTriage, a subsidiary of CD ROM, Inc., is a specialized digital data recovery and destruction company to provide recovery services for optical and electronic media. eTriage's experience with data recovery dates to the early days of hard disc drive manufacturing and the birth of compact discs. Our engineers provide data recovery on all forms of electronic media including CD, DVD, Blu-ray, spinning hard drives, solid state hard drives, flash, media cards, memory sticks, and other forms of electronic storage media.

Because we are experts in recovering digital data, we are experts in the safe processes and equipment used to destroy digital data to levels beyond forensic recovery techniques. We offer secure on-site and off-site services with highly vetted, knowledgeable and friendly trained personnel.

Please visit www.eTriage.us for a complete list of services.

Our Services include:

- A no-charge comprehensive analysis of your damaged electronic media. (Freight charges excluded.)
- Rapid screening and triage service to determine viability of data retrieval
- Examination of media, e.g.: CD, DVD, hard drives, tapes, and memory sticks, SSD, etc.
- Rapid extraction of non-damaged files
- Complex, comprehensive examinations of fatal flaws in media and prospect for recovery of important data
- Retrieval of deleted data if it still exists in the virtual world
- Clear expert witness expertise available under separate contract options

Cover design and catalog by EmSpace Publishing

About the Cover:

Many believe the compact disc originally was conceived by James Russell, who is believed to have imagined this technology as early as 1965 while he worked for the Pacific Northwest National Laboratory. He called his optical disc an optical digital recording, or ODR. Sony and Philips are widely credited with inventing the technology and, indeed, significant alterations to Russell's early concept as well as other developments in technology, including the laser, were implemented after Philips and Sony licensed the ODR system. Audio compact discs hit the market in 1978 while compact disc read-only-memory, or CD-ROM, saw its' first light-of-day in a commercial applications in 1985. DVD, and the newer Blu-ray discs, all stem from this original idea.

Hat's off to James Russell.
