# Letter from the President

By Roger Hutchison ~ March, 2013

When we formed CD ROM, Inc., in Colorado in 1988, a CD-ROM drive came in one speed and cost \$1,000. Even so, we could not stock them fast enough to meet the demands of our customers. Over time, drive speed grew to an industry average of 48x, and recorders became integrated into the same mechanism, giving us the multi-function drives we know today.

Our company later helped bring to market the first one-speed Pioneer DVD recorders, which sold for \$17,000 and were sought by major film stars, producers and many of the biggest companies in entertainment. These early recorders also proved valuable to Government agencies.

As the industry matured, there emerged a need to safely and permanently destroy sensitive data recorded onto optical discs. We met that challenge by developing and patenting fundamental digital data destruction products, including several which have been evaluated by the National Security Agency for use on media containing classified information. The branch of our company focused on destroying digital information was incorporated as Digital Data Destruction Services, or D3 Services.

As experts in destroying digital data, we also are experts in data recovery. So, as our clients developed a need to recover important data, we connected with CPR Tools and their world class data recovery products and we offered our own unique and unprecedented systems and services to recover valuable data from damaged optical discs. These services largely fall under our corporate sister, eTriage.

Twenty five years since our founding, we have gone full circle with our digital data creation products to data destruction and now data recovery. You will see over the next two years a slow and systematic incorporation of these three distinct yet integrated product lines of data creation, data destruction and data recovery.

Our history, development and record are a testament to the high level of integrity that our products and services provide to not only our Government clients, but to all of our clients. You can count on our personnel to treat you with respect and to handle your data securely. You can count on our products to last and evolve into the next generation of essential tools for digital data creation, destruction and recovery.

Roger Hutchison  
President

## CRI Standalone CD/DVD/Blu-ray Duplicators

The **CRI Standalone CD/DVD/Blu-ray Duplicator line** is a combination DVD/CD Standalone Tower Duplication System featuring high performance writers, superior drive cooling and ventilation, and powered by the leading duplication controller technology available today. The DVD Tracer Pro is the perfect solution for applications requiring the high capacity of DVD media, including videography, medical imaging, data backup and interchange, as well as many others. These systems also support CD-R, providing users with dual functionality and versatility. Their user friendly interface combined with simple two button operation allow any novice user to easily duplicate multiple general purpose DVD's and CD's.

### Features:

- Standalone Dual Format Drive Technology
- User Friendly Two-Button operation
- Multiple Cooling Fans for maximum drive life
- Configurations from 1 to 1 thru 1 to 10 drives
- USB 2.0/FireWire Interface
- Internal 160GB Hard Drive

### Controller Command Functions Include:

- Copy
- Test
- Emulate
- Language on Controller: English, Spanish, French & Portuguese
- Copy + Compare
- Verify
- Quick Erase

## CRI DC-10 CD/DVD Daisy Chain Duplicator 10-Target, Standalone

**Link additional towers together** for large duplication applications—a total of 255 towers, 2550 targets! Unit consists of 10 DVD writers and (1) 320 GB HD This tower can be used as a standalone tower or linked to other Daisy Chain Units .

### Features:

- No PC required. Fully stand alone.
- Built-in 360GB hard drive—Ability to load disc image to HDD and rename the partition
- Counter Function, Copy Function, Test Function, Compare Function, Verify Function.
- Auto Source Disc Analyzing, Audio Track Edit
- Set Burn Speed, Select Source Drive
- Prescan, Quick Erase, Full Erase, Eject All Disc
- Disc Info, Drive Info, System Info
- Intuitive user-friendly LCD panel—Optional button beep - can be disabled for silent operation.
- Linked Firmware Upgrade Controller, Upgradeable BIOS Firmware, Synchronize Firmware Controller
- 1 year warranty, parts & labor

## CRI Secure Disc Series CD/DVD Duplicators

Hardware-based copy protection that discourages unauthorized duplication. No computer or proprietary software needed. No per-copy royalty to pay and no one to call for software licenses.

### Features:

- Standalone, no PC required
- 24x DVD-ROM
- Exclusive Secure Disc<sup>1</sup> Technology automatically encrypts copyright protection on duplicated discs (available on DVD-R video discs. The video file size must be greater than 1GB in order to copy protect discs using Secure Disc copy protection technology)
- Optional 250GB Hard Drive - Dynamic Hard Drive Partitioning automatically adjusts hard drive partitions based on the size of your master disc
- Dual-Level Security provides separate Startup and Setup passwords for complete restriction and protection against unauthorized users
- PC playback enabled/disabled option (adds more encryption security)

# Optical Disc Destruction

\*The DX-CD2™ has been evaluated by the NSA and meets the requirements of NSA/CSS Specification 04-02 for Optical Media.

Additionally, the DX-CD2 meets the requirements of the Canadian Royal Mounted Police (RCMP) for listing in the G1-001 Security Equipment Guide (SEG) as an approved device for the destruction of all Classified and Protected information on optical media when used in accordance with the operating instructions.

## DX-CD2™ CD/DVD Disc Destruction Device\*

The DX-CD2™ Second Generation DX-CDe Destruction Device is the newest generation of CD/DVD destruction devices produced by the industry leader in the field of digital data destruction. Suitable for CD/DVD/Blu-ray.

This product is designed with the high-security sector in mind and follows the high quality standards we have used for the past few years in our Department of the Defense (DoD) product line for classified data destruction. The DX-CD2™ design specification requires the data layer of optical drives to be ground to 250 microns - eliminating forensic recovery of data by any known means.

	Commercial Price	GSA Price
DX-CD2	\$1,599	\$1,495
Cutter	\$79.95	\$74.35
Dust Bag (set of 3)	\$ 9.95	\$ 9.25

The DX-CDm™ is a manually operated disc destruction device. It is the world's first fully manual device demonstrated to substantially exceed the NSA specification for residue particle size when removing the information-bearing layer on CD-ROM, CD-R and CD-RW discs. The hub ring or clamping area of the disc remains untouched thus allowing for confirmation of destruction.

The DX-CDm™ is designed to be used in ships, aircraft, fighting vehicles, and field units. The 20 pound unit uses very little space and can be mounted in any convenient location.

	Commercial Price	GSA Price
DX-CDm	\$2,683	\$2,495
Abrasive pad set	\$19.95	\$18.55

# Hard Drive/Tape Destruction

**Hammer™ and SCSI Hammer™ by CPR Tools** are hard disk drive erasure tools. These easy-to-use, one-step devices implement the Security Erase command to completely purge all data from ATA and SCSI hard drives. The **Hammer™** connects up to four (4) hard drives via standard cables (included) and erases data simultaneously at up to 4.0GB/Minute. The **SCSI Hammer™** addresses up to 30 attached drives at once! 50 pin and 68 pin supported. For on-site data purging, these compact and portable devices operate as stand alone and will store up to 256 sessions before being transferred to a host PC.

**The Hammer™**

**The SCSI Hammer™**

**Hard Travel Case** for the Hammer, PSIClone and associated adapters

**The Sledge Hammer™** The Sledge Hammer™ allows up to 8 drives to be subjected to the same rock-solid, NIST 800-88 compliant data eradication at one time. **Up to 4 Sledge Hammer™ devices can be used with Hammer at one time for a total of 32 drives.**

Available in PATA or SATA interfaces.

	Commercial Price	GSA Price
Hammer™	\$4,795.00	\$4,459.35
SCSI Hammer™	\$4,795.00	\$4,459.35
Sledge Hammer™	\$2,495.00	\$2,320.35
Hard Travel Case	\$295.00	\$274.35

# Hard Drive/Tape Destruction

## Mag eraSURE ME-P2V Degausser

The **Mag EraSURE degausser** is an ideal solution for industries in the security, financial, legal, medical and data center markets requiring fast and secure erasing of hard disk drives, removable disks and backup tapes that contain confidential or highly sensitive information.

**Featuring one-touch operation**, the Fujitsu Mag EraSURE is extremely user friendly. Simply insert the drive into the degausser, push the button, and the device handles the rest. Also, with its convenient desktop size, Mag EraSURE is perfectly suited for operation in the field or office.

### Features

- Purge magnetically recorded data up to 5000 Oe(1)
- Erases hard disk drives with perpendicular recording media up to 5000 Oe and longitudinal recording up to 5300 Oe(1)
- Durable permanent magnet technology for long product life
- Desktop size is convenient for use in the office or field
- Secure data disposal for financial, medical and legal markets
- Model — ME-P2V
- Media — HDD: 1.0", 1.8", 2.5", 3.5" (up to 1.6" height), Tape: SDLT, DLT, LTO, DAT, TRAVAN, AIT, QIC, 8mm, Floppy disks and other removable magnetic disks
- Operation time — 60 seconds (two passes)
- Magnet field strength — 1.3 Tesla max
- Product life — 10 years
- Top surface field strength — 80 gauss or less
- Bottom surface field strength — 220 gauss or less
- Rated power — 120 V - 60 Hz, 1A or less
- Dimensions — 340mm x 605mm x 215mm
- Weight — Approx. 60 lbs.

# Recovery Products

**Developed by CPR Tools' engineers** in answer to their own data recovery lab technicians' requests, PSIClone™ is packed with useful features for the forensic investigator. Designed with forensic data integrity in mind, a key feature of PSIClone™ is that the user is unable to write to the 'source' side of the device. With the included data recovery software, PSIClone™ has everything you need to perform data recoveries - right out of the box.

**While PSIClone™ is a drive-to-drive cloning and imaging device**, it stands out from other such devices because PSIClone™ has the ability to perform a robust compression while imaging a drive, thereby allowing you to place images of multiple drives on a single dump drive. This saves time and money.

**PSIClone™**  
*by CPR Tools*

**Version 4.4 of PSIClone™ is the most robust ever!**

**Featuring:**

- Built in Forensic Write-Block
- Built in PATA and SATA interfaces
- Sector to Sector Cloning
- Drive Imaging
- On-The-Fly Image Compression
- G-Clone™ (Clone the G-List)
- Email Alerts (allows the user to input an email address which gets notified when the process starts, stops, errors or at specific time intervals)
- MD5 Hash generation
- Drive erasing with user selectable methods
- Image Resume - allows the user to stop and resume image files
- USB 2.0 Write Block feature (Mass Storage Switch)
- FastClone™ - File System Copy
- Partition Copy
- Recovery Software included with every PSIClone™

## PSIClone™ with DriveKey™ by CPR Tools

### All the features of PSIClone™ plus:

- Retrieve User and Master ATA passwords from supported drives (without clearing them)
- Unlock drive using ATA password (password can be retrieved with DriveKey or can be previously known)
- Lock drive using ATA password. Supports High and Max User password
- Set Master password and master password revision code
  - Save and/or print log of password setting/retrieving activity
  - Passwords can be entered and viewed in both ASCII and Hex format

### Additional Drive Information:

Password type	Security	Locks Drive	Unlocks With
User	High	Yes	User Password
User	Max	Yes	User or Master password
Master	N/A	No	N/A

**DriveKey™ allows the retrieval of ATA passwords** which are in effect for drives which are fully supported,. For supported and unsupported drives, DriveKey™ acts as a user-friendly front-end to the locking and unlocking of drives at all security levels. Launch DriveKey™ by clicking the Security button in the CPR Toolbox™ toolbar to reveal the DriveKey™ menu item. Click DriveKey™ to begin.

**\*Seagate drives require the purchase of the SeaKey adapter to retrieve passwords**

	Commercial Price	GSA Price
<b>PSIClone™ with DriveKey™</b>	<b>\$2,999.00</b>	<b>\$2,789.07</b>
<b>DriveKey™ update*</b>	<b>\$1,000.00</b>	<b>\$930.00</b>
*DriveKey™ firmware update is available for existing PSIClone owners

## AlarmDisk™ v2

by CPR Tools

**AlarmDisk™** is a security tool that monitors the usage of detectable ATA drives. By monitoring and reporting on key system activities, AlarmDisk™ v2 stands alone in its ability to provide one stop security information about computer changes or unauthorized uses of your data. Available as a download. 1yr license.

**AlarmDisk™** quietly runs in the background all the while listening and checking the system to ensure security. If AlarmDisk™ notices an event that should be reported it will automatically notify the user via the system tray icon. A yellow alert notification indicates that an event has taken place which you want to be notified about. A red alert notification indicates a possible system compromise to the user.

### Key Features:

- Power Cycle Count — PCC Alerts user to possible unauthorized access to the hard drive by booting from USB, CD or other media
- USB Viewer -One of the exciting new features in AlarmDisk™ is the ability to monitor USB ports identifying that a USB device was connected to your computer. This feature is useful for business travelers, organizations and anyone that wants to ensure they are protected.
- S.M.A.R.T. statistics and warnings (Self-Monitoring, Analysis, and Reporting Technology) alerts user to possible hard drive failure
- Windows Event Logs
  - \* System Time changes
  - \* Startup/Shutdown counts
  - \* Clearing of Security Log
  - \* User rights adjustments
  - \* User password changes
  - \* User account deletions
  - \* Computer Account creations, deletions or modifications
- Clipboard History
  - \* Copied Files
  - \* Copied Text
- File system changes (user selected paths)
  - \* Files created
  - \* Files deleted
  - \* Files renamed

Commercial Price	GSA Price
\$49.95	\$46.45

\*1yr license

### Who Needs AlarmDisk™ ? You do, if:

- You take your laptop on business trips
- You're concerned about being hacked
- You're serious about your system's security
- You're serious about the health of your hard drive

# Mini Ruggedized PCs

**The LIV M1i Mini PC features the Intel Core i3-**processor. Blazing speed in a stylish, compact footprint at a competitive price, this system is perfect for office or home. The Intel Core i3 second generation processor features 3.1 GHz and is coupled with 8 GB DDR3 1333 MHz memory, delivering the performance you need for smart multi-tasking. Win7 Pro installed. Can be mounted vertically or on the back of a VESA capable monitor (monitor not included).

**CRI Solid-state Rugged BlackBox** — Cutting Edge in Speed and Size, welcome to the next generation of miniature portable power that is SRB-33. Introducing the latest Solid State Technology featuring 33 times the access speed of standard drives. The SRB-33 is shock resistant, micro-sized, with speed to spare as it delivers on all fronts of the consumer market. Regardless of its size, this professionally built PC is raising the bar in a broad range of applications.

**CRI SRW-33m, Rugged and Waterproof** — CD Rom, Inc introduces the SRW-33m. Based on the popular SRB-33, this Tactical PC is rugged AND waterproof. Like the SRB-33, this newest tactical computer from CD Rom, Inc. features Cutting Edge technology in Speed and Size. This fanless system incorporates Solid State hard drive technology, 33 times the access speed of standard ATA drives. The SRW-33m is shock resistant, micro-sized, and waterproof with speed to spare as it delivers on all fronts of the consumer market. Regardless of their size, these professionally built PCs are raising the bar in a broad range of applications.

# From Destruction to Creation

## We can give your data life

Restoring the Heart Beat of Data

### Electronic Forensic Solutions and Electronic Data Analysis

- **A no charge comprehensive analysis** of your damaged electronic media: no cost except freight unless we can recover some or all of your data. You will decide once we give you our diagnosis, prognosis, and etiology
- **Friendly and knowledgeable advice**
- **Rapid screening and triage service** to determine viability of data retrieval
- **Examination of media**, e.g.: CD, DVD, hard drives, tapes, and memory sticks, SSD, etc.
- **Rapid extraction** of non-damaged files
- **Complex, comprehensive examinations** of fatal flaws in media and prospect for recovery of important data
- **Retrieval of deleted data** if it still exists in the virtual world
- **Clear expert witness expertise** available under separate contract options

**D3 Services processes millions** of CD and DVD discs, hard disk drives, floppies, all forms of magnetic tapes, flash drives and virtually any type of media with a binary signal. Unlike our competitors, we use patented equipment which is designed for handling safe destruction of classified data for the military.

**With Corporate offices located in Fort Myers, Florida** and a large secure facility in Iron River, Wisconsin, D3 Services is the first and only service bureau established in the US designed specifically to destroy digital data on all electronic media. The service bureau includes CCTV surveillance, controlled employee access, staffed Notary Public, professionally certified employees, and itemized certificates of destruction for your records.
